

S&P Capital IQ Pro

Prepared for Pareto Securities

Artificial Intelligence Solutions on Capital IQ Pro

Continuously investing and innovating to create value for users

Topic Tags

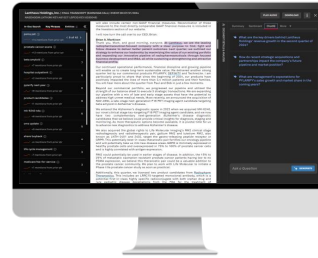

- Supplementary **AI-based industry taxonomy**
- Assigns **276 niche industry tags** to companies based on their business descriptions.

News Summarisation

- **AI-generated daily news digests**
- Captures major events and provides snapshot market values.

Document Intelligence

- GenAI-powered document analysis
- Enables **summarization and analysis** across selected **filings, transcripts, news, and investment research.**

Chart Explorer

- **Summarizes key insights** and trends observed from a company's price movements or performance.

AI Formula Builder

- Excel add-in **formula builder AI assistant**
- Helps users **construct dynamic formulas** within the Excel add-in

Sentiment Analytics

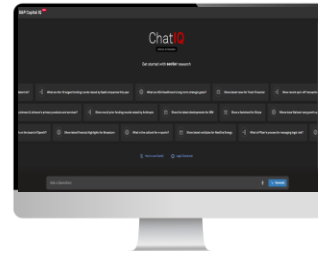

- **Pronto NLP model** for earnings-call sentiment analysis
- **Assesses sentiment at the topic level** and differentiates between positive and negative sentiment, including severity.

Transcript Summarisation

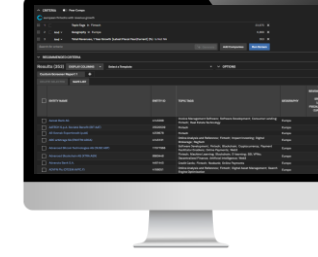

- AI-generated structured earnings-transcript summaries
- **Highlights** clearly **key takeaways** by topics.

ChatIQ

- GenAI-powered Q&A assistant
- Produces responses using **multiple S&P Capital IQ Pro content sets.**

Natural Language Screening

- Enables **company screens using natural-language prompts.**

AI Assist Help

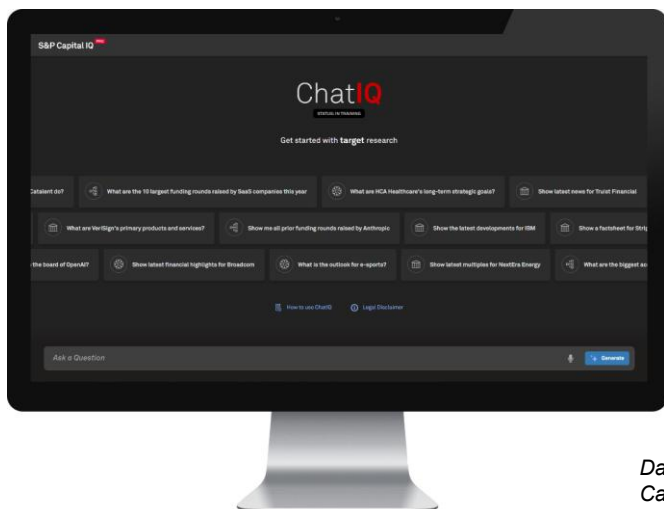

- **AI assistant** for platform navigation and user support
- Helps users **navigate the platform and resolve queries**

ChatIQ

Generative AI powered assistant that lets you ask questions on S&P Capital IQ Pro data

HOW IT WORKS

When you enter a natural language question, ChatIQ leverages a **Large Language Model (LLM)** to answer your natural language questions based on the following **S&P Capital IQ Pro datasets**:

- S&P Capital IQ Financials
- Company Details
- Products
- Professionals
- Key Developments
- News & Industry Research
- Transactions
- Market Data
- Global Annual Filings*
- Global Earnings Call Transcripts

Data is available in the same timelines as S&P Capital IQ Pro (*refreshed on a daily basis).

Answers in ChatIQ let you click-through to the source within Capital IQ Pro, so you can quickly navigate the platform and confirm accuracy.

S&P Global
Market Intelligence

GET STARTED

Use ChatIQ to **uncover insight** and **inform decision-making** in various business areas:

Company Profile: Gather background on history, key individuals, mission, etc.
"Can you write a business description for Netflix as a short executive summary?"

Competitor Landscape: Assess peer performance, SWOT, and developments.
"What recent innovations has Nike had? How have they differentiated from Adidas?"

Industry Analysis: Evaluate industry trends, conditions, and customer behavior.
"What major trends/technology are affecting the Healthcare industry today?"

Market Monitoring: Track financial markets, deals, and investments.
"What's the 52 week High/Low and latest closing price for NVIDIA?"

Financial Analysis: Examine financial highlights, statements, and multiples/ratios.
"Show the latest financial highlights for Samsung."

Strategy: Analyze strengths, weaknesses, opportunities, and threats (SWOT).
"Where does DoorDash see growth opportunities?"

Sales & Operations: Understand product pipeline/processes and sales strategy.
"What is Apple's supply chain structure? What is their pricing strategy?"

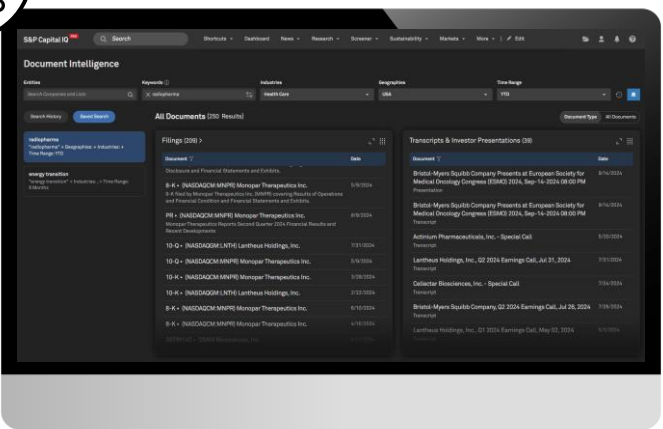

Legal: Investigate regulatory compliance, lawsuits, and other related legal factors.
"What are legal issues TikTok has faced over the last year?"

Document Intelligence

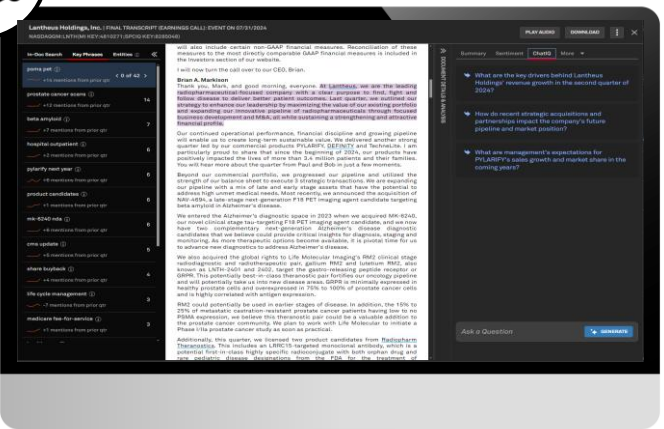

Gen-AI supported document workflow tool that enables smart search across Filings, Transcripts, News, and Investment Research

Search & Discovery

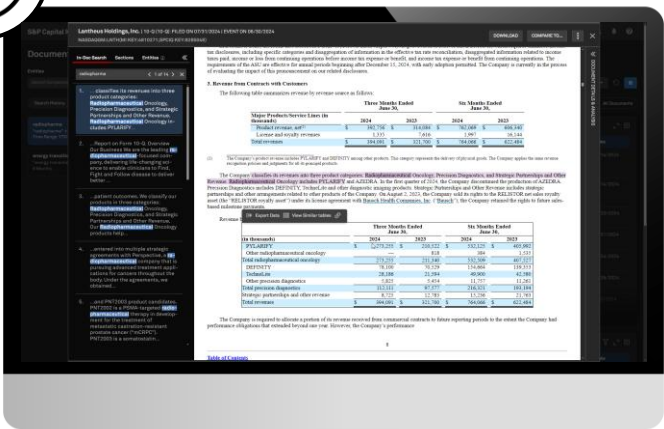

- **The redesigned layout and landing page** make it easier to learn more about a topic of interest by surfacing news articles, filings, transcripts, and investment research that are related to the topic.
- **Use Smart Synonyms** for an enhanced keyword search experience
- **Navigate to saved search and search history** to quickly access previous keyword searches.

Generative AI Insights

- **Access the Integration of Generative AI assistant ChatQ** to query documents for insights such as financial highlights, strategic initiatives, drivers of growth, operational challenges, and more.
- **Use Transcript Key Phrases** to highlight relevant and significant topics within earnings call transcripts.
- **Use Transcript Summarization** to get summaries from earnings call transcripts by topics or sentiment.
- **View Transcript Sentiment Scores** to understand how a company's narrative is perceived by investors

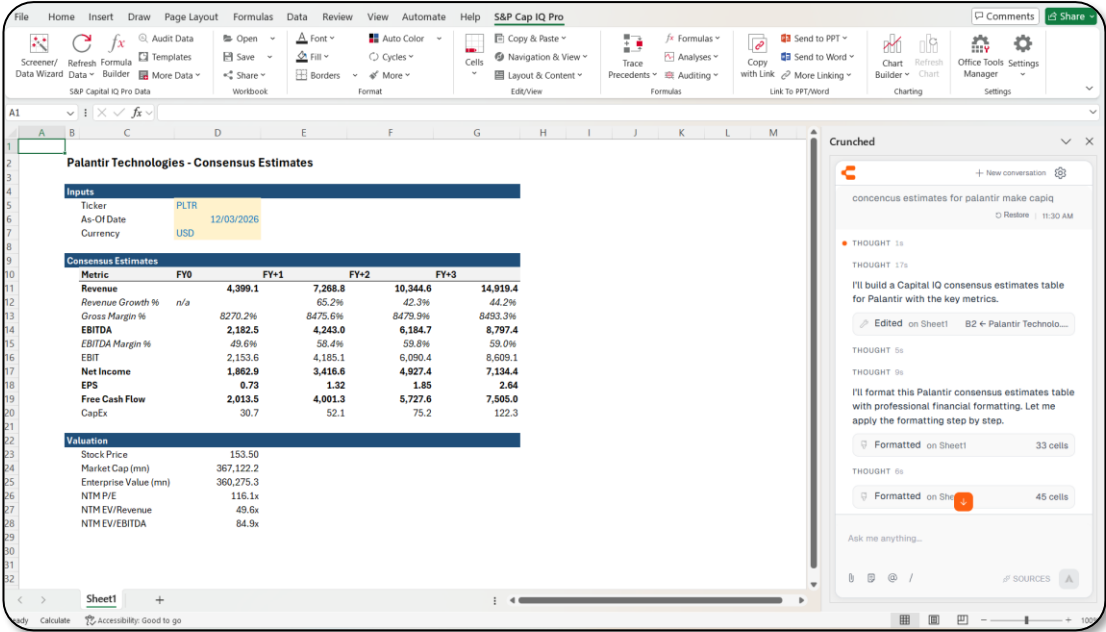

Workflow Efficiencies

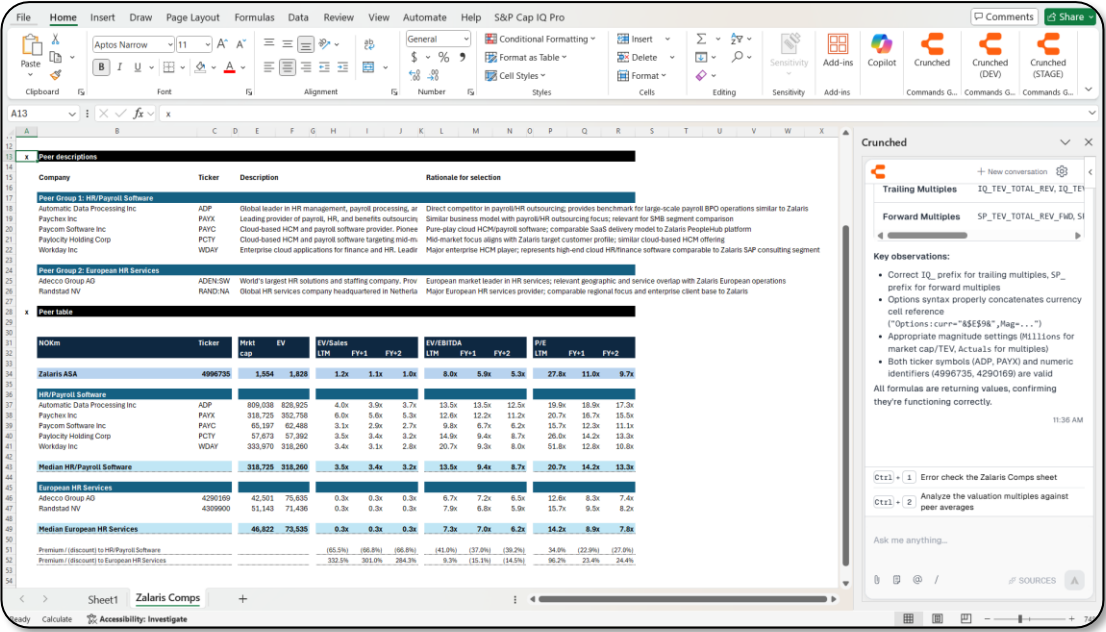

- **Extract data from tables** in company filings and broker research reports to Excel.
- **View the Similar Tables** feature to export historical as-reported data from company filings to Excel.
- **Share** text and tables from documents with colleagues.
- **View all entities** mentioned in a document and navigate to the Corporate Profile page.

Roadmap

ChatIQ | 2026 Roadmap

	Capabilities	Content Sets
H1 2026	• Create a Chart • Personalized Home Page with a feed of content • Upload & Chat with Proprietary Documents • Company Screening • Access to Peers, Lists, Portfolios, and Index Constituents • More precise questions and follow up context understanding • Pre-suggested Follow Up questions	• CIQ Peers • CIQ Financials • CIQ Estimates • Multiples • M&A Transactions • Equity Market Data • Investment Research • Filings (All) • Transcripts (All) • Macroeconomic Data • Credit Ratings • Equity Ownership • Rates & Yields • SNL Financials (Bank) • SNL Financials (Insurance) • Bank Reg • Depository Rates
H2 2026	• Set an Alert • Chat History • Incognito Mode • CreditCompanion (S&P Ratings Reports)	• Visible Alpha Estimates • Depository Market Share • Bank Branch

ChatIQ | H1 2026 Release Highlights

Supported prompts

Single Company

- Build a peer comp table with valuation multiples for Company X? How does X compare to peers? (CIQ Peers, Multiples, Financial Ratios, market Data, Financials)
- How has credit worthiness of X company changed over the last 12 months? (Credit Ratings, Financials, Visible Alpha, News)
- What were the drivers of company X multiples peaking in November 2023 (Multiples, CIQ Financials, Transcripts, News, Estimates, Investment Research, Charting)
- How has X bank's loan portfolio been impacted by trends in commercial real estate (Bank Reg, Transcripts)
- Summarize how X bank is adopting Basel III regulations (Filings, News, SNL Financials)

Multi-Company

- Compare operating metrics over last 8 quarters for this peer group and summarize outlook for next 12 months? (CIQ Peers/ VA Peers, CIQ Financials, Multiples, Investment Research, Charting)
- Identify banks with a funding mix of 60% deposits or more and a market share of 10% or more in the southeast (Screener, Bank Reg, Deposit Market Share, Bank Branch, SNL Financials)
- Can you provide a list of potential acquirers or buyers interested in midstream energy sector who have recently shown interest in acquiring companies or have a history of M&A activity? (Find Buyers, M&A, Screener, Lists, Investment Research)
- Summarize the management tone, main themes and strategic priorities from "Health Care Portfolio" earnings calls and present 3-5 bullets for a client report (Lists, Transcripts)
- What are total charge-offs for leases & loans for bank X over last 3 years and how does that compare to peers? (Bank Reg Financials, Peers)

Macro Trends

- What is the impact of tariffs on US financial companies? (Filings, Transcripts, Investment Research, News, Equity Pricing, Index Pricing)
- Summarize recent trends in global electricity demand driven by AI and cloud computing growth (Filings, Transcripts, Investment Research, News, Industry Research)
- What is the outlook of weight loss drugs? (VA BioPharma, News, Investment Research, Transcripts, M&A)
- What's the banking industry outlook of Europe by top ten banks by assets in Europe? (Screening, SNL Financials, Transcripts, Investment Research)
- What are the top cost drivers in consumer retail and how do they impact margins? (Filings, Transcripts, Investment Research, News, CIQ Financials)

Appendix

ChatIQ Document Intelligence | Transcripts

Leverage ChatIQ and other artificial intelligence solutions to efficiently analyse transcripts

1 Sentiment History: Scores are based on the calendar quarter the event occurred. Net Positivity: 0.87%, Industry Average: 0.78%.

2 Key Phrases: what were the capex updates

3 Document Details & Analysis: Summary, Legal Disclaimer, Recent and Ongoing CapEx Investments.

4 Document Details & Analysis: Summary, Legal Disclaimer, Recent and Ongoing CapEx Investments.

5 ChatIQ: how has guidance evolved over time

6 S&P Capital IQ: BAE Systems plc | LSE:BA. Earnings Call (Transcript): EVENT ON 2026-02-18T00:00:00

Evolution of Guidance at BAE Systems
Full Year 2025 Guidance (H1 2025 Earnings Call)

- After a strong first half, BAE Systems upgraded its full-year guidance for 2025, raising sales and EBIT growth expectations by 100 basis points expected to grow 8% to 10%, and underlying EBIT was expected to grow 9% to 11% on a constant currency basis. EPS guidance is at 8% to 10%, mainly due to fewer shares being repurchased (driven by a higher share price) and a marginally higher tax rate. Free cash set at higher than GBP 1.1 billion, excluding any material advances.
- The 3-year cash guide showed the business delivering GBP 5 billion to GBP 6 billion in free cash flow across 3-year cycles, even with investment and advance consumption.

Full Year 2025 Actuals & 2026 Guidance (2025 Earnings)

1. **Analyze sentiment** using **ProntoNLP** to gain insights into net positivity trends and sentiment related to specific topics
2. **Explore key phrases** to identify trending topics
3. Create **shareable links** to text for easy collaboration
4. **Pool multiple transcripts** in **ChatIQ** to analyze how performance metrics have evolved over time
5. **Converse with ChatIQ** to surface insights and generate summaries from your prompts, with the option to translate them
6. Access **generative AI summaries** that can be configured as alerts

ChatIQ Document Intelligence | Filings

Leverage ChatIQ and other solutions to efficiently analyse filings

The screenshot displays a financial filing analysis interface. On the left, a sidebar shows a 'Table of Contents' with a red circle '1' next to it. The main area shows a financial statement for BP p.l.c. with a red circle '2' next to the 'Export Data' button. A red box highlights a portion of the financial statement, showing a table with columns for '2025', '2024', and '\$ million 2023'. The table includes rows for 'Sales and other operating revenues', 'Earnings from joint ventures - after interest and tax', 'Interest and other income', 'Gains on sale of businesses and fixed assets', 'Total revenues and other income', 'Purchases', 'Production and manufacturing expenses', 'Production and similar taxes', 'Depreciation, depletion and amortization', and 'Net impairment and losses on sale of businesses and'. Below the table, a ChatIQ chat window is open, showing a query 'how did the capital return policy differ across the peers' and a response titled 'Capital Return Policy: Comparison between Thales and BAE Systems plc'. The response includes details about Thales S.A.'s share buyback program and BAE Systems plc's capital return policy. A red circle '6' is next to the ChatIQ chat window. A red circle '3' is next to a 'What were BP's main drivers for changes in profit and cash flow in 2023?' prompt in the ChatIQ chat window.

S&P Capital IQ

BP p.l.c.

Depreciation, depletion and amortization	5	17,822	16,622
Net impairment and losses on sale of businesses and	4	6,037	6,995

ChatIQ

how did the capital return policy differ across the peers

Capital Return Policy: Comparison between Thales and BAE Systems plc

Thales S.A.

- Thales S.A. conducts share buybacks, holding treasury shares for several purposes: disposal or allotment to employees and directors, cancellation, and market price regulation via a liquidity contract. As of December 31, 2025, Thales held 484,490 shares (0.23% of share capital) valued at €106,739,802. The buyback program proposed to the AGM of May 12, 2026 allows repurchase of up to 10% of share capital, with a maximum unit purchase price of €350 and a theoretical maximum amount of €7.2 billion. Objectives include allocation to employees, retention for external growth transactions, market operations, and cancellation of shares. Thales did not use derivatives in the buyback program.

BAE Systems plc

- BAE Systems plc's capital return policy is focused on dividends. In 2025, the Board approved a final dividend of 20.6p per share for 2024 and an interim dividend of 13.5p per share for the first half of 2025. The company also engages with investors on capital allocation and shareholder returns, and hosts events such as the AGM for investor engagement. There is no mention of a share buyback program or treasury share management in the available documents.

Chat IQ | Sector Research & Analysis

Use multiple sources to generate comprehensive generative AI sector insights

1 What is the outlook for the European oil and gas sector?

The outlook for the European oil and gas sector is shaped by a mix of moderate growth, structural challenges, and ongoing energy transition efforts.

- Strengths:**
 - Despite geopolitical tensions and energy price volatility, the European oil and gas sector has shown resilience, with global upstream spending by oil companies remaining broadly stable at \$530 billion in 2025 and offshore E&P CapEx increasing by 6% year-on-year to \$179 billion, supporting continued investment in exploration and production activities.
 - LNG imports have reached record highs, with the United States providing nearly 60% more LNG than in 2024, and Europe is experiencing easing of market fundamentals as new liquefaction capacity comes online, supporting supply security and diversification.
 - The energy transition is driving investment in decarbonization technologies, such as carbon capture and storage (CCS), hydrogen, with the EU setting ambitious emissions reduction targets (90% by 2040 vs. 1990) and supporting projects through subsidies and frameworks.
 - The energy industry remains a robust customer segment for industrial service providers, with strong demand supported by significant investment in renewables, battery storage, and grid expansion (USD 128 billion in low-emission power generation and USD 92 billion in grid expansion and storage in the EU in 2025).
- Weaknesses:**
 - The sector faces significant risks from geopolitical events, such as the conflict in Iran and the blockade of the Strait of Hormuz, which have led to sharp increases in oil and gas prices (Brent crude up \$15, gas up more than 50%), raising the risk of stagflation and further squeezing industrial margins already eroded by previous energy crises.
 - European gas inventories started 2026 at a deficit of approximately 14% compared to the previous year, missing the EU's 90% fill target and increasing reliance on LNG imports, which leaves the system more exposed to geopolitical and congestion risks.
 - The UK oil and gas industry is expected to see a decline in production by a quarter between 2024 and 2027 due to the end of new production licenses, leading to a decline in output.
 - The European oil and gas sector is expected to experience moderate growth, with GDP growth in the Eurozone projected at +1.2% in 2026, but faces ongoing challenges from high energy costs, geopolitical risks, and the need for structural transformation.
 - The sector is increasingly focused on decarbonization, with investments in CCS, hydrogen, and renewables expected to grow, supported by EU policy and funding, though new financial impetus from the EU budget is not expected until 2028.
 - The market remains sensitive to external shocks, and the outlook is conditioned by the duration and intensity of geopolitical conflicts, energy price volatility, and the pace of energy transition.

2 In summary, the European oil and gas sector is navigating a period of moderate growth, heightened geopolitical and cost risks, and accelerating energy transition, with resilience in supply diversification and investment in decarbonization, but facing structural challenges in traditional segments and exposure to external shocks.

4 While piped imports fell, LNG imports hit an all-time high of over 175 bcm, with the United States providing nearly 60% more LNG than in 2024 and accounting for almost all incremental growth.

5 Expected development for the EPF Group The European gas market in 2026 is set to be defined by an "unfolding LNG wave" as global supply growth accelerates to its fastest pace since 2019.
